hadn't been that sick for that long in 30 years of adulthood (although in fairness the acute phase really only lasted 24 hours; it was the sudden fierce onset that was truly shocking.

Given that there are 206 bones and 600 muscles, there's a chance that something isn't moving right.

Similar side effects, which may be due to the fact that the medications work in a similar fashion by blocking

However, certain colors may also indicate a serious intestinal conditions—and potentially even some forms of cancer:
